TwinBin®

A revolutionary system that allows you to set your exact usage requirement with the next build rate supply released at the pull of the side

- Inventory Control – up to 82% of stock reduction has been recorded
- Traceability – offers opportunity for 100% traceability even for small components
- Less Waste – every part issued and accounted for
- No Environmental Contamination – parts are retained in a closed bin
- No Stock Cross-Contamination
- Reduces Line Stoppages
- Rapid Payback on Investment

TwinBin®

The standard system is the TwinBin® which comprises any number of bins with two compartments mounted vertically and divided by a slide. The pull-down doors enable the bins to be loaded with product and the operator accesses only the lower bin until all components have been used. He then pulls the slide to allow the product in the upper bin to fall into the lower bin. The empty bins can then be easily identified for replenishment. Total control of product is possible with full traceability.

Automated options to the TwinBin® system are available on request.

1. **Rack Identification Header**
2. **FlagBin Device**
(Customer's logo available)
3. **Single Blue Locking Bar**
(available red or grey)
4. **Single TwinBin Dispenser**
147mm wide
5. **Double Blue Locking Bar**
6. **Double TwinBin Dispenser**
285mm wide
7. **Coloured Barcode Ticket Holder**
red, blue, green, grey or yellow
8. **0.75 wide Aluminium Rack**
(Holds 50 TwinBins in total,
also available 1.5m wide to hold 100 TwinBins
and other racking options available)
9. **Foreign Object Debris Tray**
10. **Castors (2 swivel, 2 Locking)**
